

GMS MORTISE CYLINDER COLLARS/RINGS

GMS mortise collars provide a clean, secure, and professional installation for mortise cylinders across commercial and institutional applications. Each collar is precision-machined from solid brass to ensure long-term durability, consistent fitment, and resistance to tampering or rotational force. Designed to meet OEM dimensional standards, GMS collars deliver reliable alignment between the cylinder and the lock body, helping maintain smooth key operation and overall system integrity.

FEATURES

- ▶ Manufactured to OEM specifications
- ▶ Available in 4 Finishes (03, 10B, 19, 26D)
- ▶ Solid Brass Construction
- ▶ Available in multiple thicknesses
