

MX Restricted Key Control

Designed to work with most existing hardware, MX by GMS offers restricted key control without costly investment in new hardware. Retrofitting most existing systems with MX is easy and affordable. Security managers can rest assured that the keys used in their facilities cannot be duplicated at hardware stores or big box retailers.

These cylinders are designed to be master keyed, grand master keyed and great grand master keyed and will work with both traditional style cylinders as well as LFIC interchangeable cores all in one system.

The MX system uses Schlage Specifications SC1 or SC4 for easy pinning and cutting keys. GMS is the add easy and cost effective choice for key control for your facility.

FEATURES

- ▶ Restricted keyway to prevent unauthorized key duplication
- ▶ Works with mortise, rim, knob, lever and interchangeable cores LFIC
- ▶ Allows pinning an entire building across commercial applications on one system
- ▶ Uses Schlage specifications SC1 or SC4 for easy pinning and cutting keys
- ▶ Keys are serialized for key control and are sold separately from the cylinders
- ▶ Specially designed top pins are pick-resistant
- ▶ Contractual agreement between GMS and Distributor. Contact your local Distributor for availability in your area to become an authorized Dealer

ONE KEY FITS ALL

MX cylinders are manufactured to the exacting specifications you have come to expect from GMS.
