

GMS PADLOCKS

GMS Padlocks provide reliable security for commercial, industrial, and institutional use, built with a durable solid-brass body and hardened boron shackles for strong cut and pry resistance. They're engineered for smooth operation, long service life, and consistent performance in demanding environments. Cylinder options include KIK/KIL, SFIC, LFIC, and other interchangeable formats to match existing key systems and support flexible keying requirements.

FEATURES

- ▶ Solid brass body construction
- ▶ Hardened shackles
- ▶ Double ball locking
- ▶ 3 shackle lengths available
